TITLE : SAFETY DEVICE FOR ELEVATOR
DOOR

ABSTRACT : PURPOSE: To provide a safety device for an elevator door which can easily recognize a safety shoe so as to surely operate the safety shoe.

CONSTITUTION: A safety device for an elevator door, is composed of a switch 2 attached to an elevator car door 1, for actuating a device for opening the car door 1 which is on closing, a safety shoe 4 attached to the front end part of the car door 1 so as to actuate the switch 2 which is therefore opened, and a light emitting device attached to the front end part of the shoe 4, for recognizing the safety shoe 4 until the car door 1 is closed.
